SPRINT 3

Sprint 3 Completed Deliverables

1. Login & Signup System

- Partially implemented.

- User authentication now works for Students and Tutors.

- Integrated with the real database.

2. Dynamic Tutor Directory

- Tutor listings now load dynamically from the database.

- Includes search and filtering (subject, pricing, rating, etc.).

- Optimized backend queries for faster loading.

3. Tutor Profile Page

- Displays tutor bio, subjects taught, hourly rate, rating, and availability.

- Connected to reviews and booking modules.

4. Dashboards

- Student Dashboard: shows upcoming/past sessions, payments, reviews.

- Tutor Dashboard: availability management, session management, earnings.

- Admin Dashboard: tutor verification, platform insights, user/activity management.

- All dashboards are now connected to live backend data.

5. Review System

- Students can now submit reviews and ratings after sessions.

- Reviews appear on tutor profiles dynamically.

6. Backend PHP Functionality

All major PHP backend logic is now implemented, including:

- User registration & login validators

- Tutor fetching with filters

- Availability retrieval

- Review system backend

- Admin functionality & verification endpoints

- Payment endpoints (if applicable)

- Full API routing structure

7. Database Integration

- A functional MySQL database now powers:

    - Users

    - Tutors

    - Subjects

    - Bookings

    - Payments

    - Reviews

    - Availability

- All front-end components now retrieve real data from the backend.

8. Booking Logic (Mostly Completed)

- Students can view availability and request a booking.

- Booking data is inserted into the database.

- Tutor availability updates accordingly.

- Remaining tasks involve:

  - Payment confirmation handling

  - Automatic reminders / status updates

9. Contact & Help Page

- Fully implemented.

- Contains FAQs, support form, and general help documentation.

Still Pending / Not Fully Implemented

1. Complete Payment Workflow

- Basic structure exists but needs full integration (e.g., live payment gateway, transaction verification).

2. Finalizing Remaining Booking Logic

- Automated notifications

- Cancel/reschedule system

- Booking confirmation emails

3. UI/UX Enhancements

- Improved styling and responsive layout across dashboard pages.

- Better user feedback messages (success, error, validation).

4. Admin Data, Analytics & Reporting

- Basic data visible, but advanced charts and analytics are pending.
- Admin Login/Sign up has not yet been implemented.

Sprint Summary

The most critical systems which are the authentication, tutor discovery, dashboards, reviews and database integration, are now completed, drastically increasing the platform's usability and readiness for real-world testing.
